

General Declaration of Conformity to RoHS and REACH (EU)

This declaration is a general declaration of conformity and applies to the products we supply in the European Union (EU) and the European Economic Area (EEA), insofar as the respective legal provisions apply to the specific product.

According to the information available to us and supplier declarations, the products we supply comply with the requirements of Directive 2011/65/EU (RoHS) in its currently valid version, insofar as this directive applies to the respective products.

With regard to Regulation (EC) No. 1907/2006 (REACH), we declare, to the best of our current knowledge and based on the information available to us from our suppliers, that substances on the currently valid SVHC candidate list are not contained in concentrations of more than 0.1 per cent by weight (w/w), unless we are aware of any deviating information based on the supplier information available to us.

This declaration is based exclusively on the material, conformity and supplier declarations available to us. We do not carry out continuous, independent material analysis or laboratory testing of individual product deliveries.

This declaration applies exclusively with regard to EU and EEA legislation. In particular, it does not constitute a declaration of compliance with legislation outside the EU or EEA.

This declaration is made to the best of our knowledge based on the information available to us. It does not constitute a quality agreement, guarantee or other assumption of liability in the legal sense.

Changes to the underlying information, the supply chain or the relevant legal provisions may necessitate an adjustment to this declaration.
